Part Number: WM 250.103NK

386 mm Horizontal Medical Arm for monitoring Adaptation for 5" plate and Nihon Kohden interface, floor or ceiling mounting. Compatible with Nihon Kohden monitoring.

Cette colonne possède deux rails de fixation pour les différents éléments qui y seront fixés. (1 rail à l'avant de la colonne, 1 rail à l'arrière)

This column has two fixing rails for the different elements that will be fixed to it (1 rail at the front of the column. 1 rail at the back)

Deze zuil heeft twee bevestigingsrails voor de verschillende elementen die eraan bevestigd zullen worden (1 rail aan de voorkant van de zuil, 1 rail aan de achterkant)

386 mm Horizontal Medical Arm for monitoring Adaptation for 5" plate and Nihon Kohden interface, floor or ceiling mounting. Compatible with Nihon Kohden monitoring.

This 386 mm Horizontal Arm allows the monitor to be fixed, oriented and adjusted perfectly. It is coated with an anti-microbial agent to ensure hygiene and cleanliness down to the smallest detail. Its modern design has been specially developed for healthcare environments.

Technical specifications:

* Optional floor or ceiling column mounting, with several heights available (1500 - 2000 mm). These columns can be easily cut to size. All cables are also routed through the column (see options on following pages)

* This 386 mm Horizontal Arm simply slides into the column rail and adjusts to the required height. It has no height adjustment

* The head of this arm complies with the mounting standard for Nihon Kohden monitors weighing up to 18 Kg.

- * Monitor tilt: 20° down and 12° up
- * Monitor rotation: 115° right, 115° left.
- * Arm rotation: 105° right, 105° left.
- * Total length: 386 mm Colour: RAL 5013 cobalt blue and RAL 9016 traffic white
- * Warranty: 5 years

Product highlights:

Non-height adjustable arm. Swivel arms and extended swivel arms offer full cable integration and easy cleaning for infection control in all critical care areas of the clinical environment. Our 5-year guarantee ensures reliable, trouble-free and maintenance-free operation. The swivel function at the point of attachment and the tilt and swivel function of the monitor adaptation provide optimum positioning of your unit. The extended swivel arm is a two-part arm with a central pivot point between the two arm sections. All bottommounted monitors have the safety feature of a 20° tilt stop.

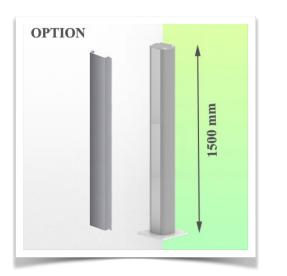

Installation information - Column slide rail

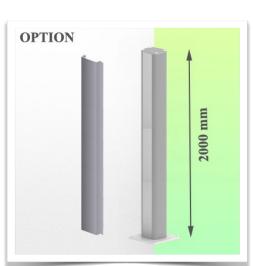

Part Number: WM 250.103NK

386 mm Horizontal Medical Arm for monitoring Adaptation for 5" plate and Nihon Kohden interface, floor or ceiling mounting. Compatible with Nihon Kohden monitoring.

Floor or ceiling column:

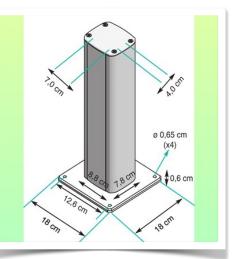

To install this medical arm, you need to use one of our medical columns. These are available in standard heights of 1500 and 2000 mm. Custom heights are available on request. Slide covers and end caps are supplied with every order.

Adaptation with 5" plunger plate

Monitor mounting plates for monitoring

The 5" plunger plate is designed to accommodate bottom-mounted monitors. Please note that a special mounting adapter is required for some monitors. The mounting adapter is installed on the bottom and slides into the 5" immersion plate. For Dräger and GE monitors, a special mounting adapter is not required. For Mindray, Nihon Kohden, Spacelabs and Philips Sure Signs/ Vital Signs monitors, mounting adapters are required. For the Philips IntelliVue series, please refer to the Philips Monitoring IntelliVue Series.

All our medical arms can be equipped with this adaptation, of which you will find some illustrations here.

All height-adjustable arms have a weight capacity of 22 kg. Rear-mounted monitor adapters and horizontally mounted 5" plinths accept a maximum monitor weight of 18 kg. An additional 4 kg can be mounted on a downstand under the front rotating part. Depending on the material and the strength factor, all weight indications have a safety factor of 4 and/or 6 times according to NF 60601-1 regulations. The current IEC 60601-1 standard for medical electrical equipment is the 3rd edition
